Login / Sign UP

A simple login/sign up form with two input fields. The first field is labeled 'PW' and the second field is labeled 'Username'.

A more detailed login/sign up form sketch. It includes a 'LOGO' at the top, a 'SIGN UP' button, and a 'LOGIN' button. Below the buttons are three input fields. Annotations point to these fields: 'Name' for the first, 'surname/second name' for the second, and 'email' for the third. A 'PW' label points to the bottom input field.

this format gives a simple tabulated format

Name

surname/second name

email

PW

* But does not have same information depth for a customer & a business

User - Consumer

Date of hotel stay (checkin & check out) with time

Unsure of the placement of this?

information e.g. Hotel name, number of people

cost

current transactions

Display Picture

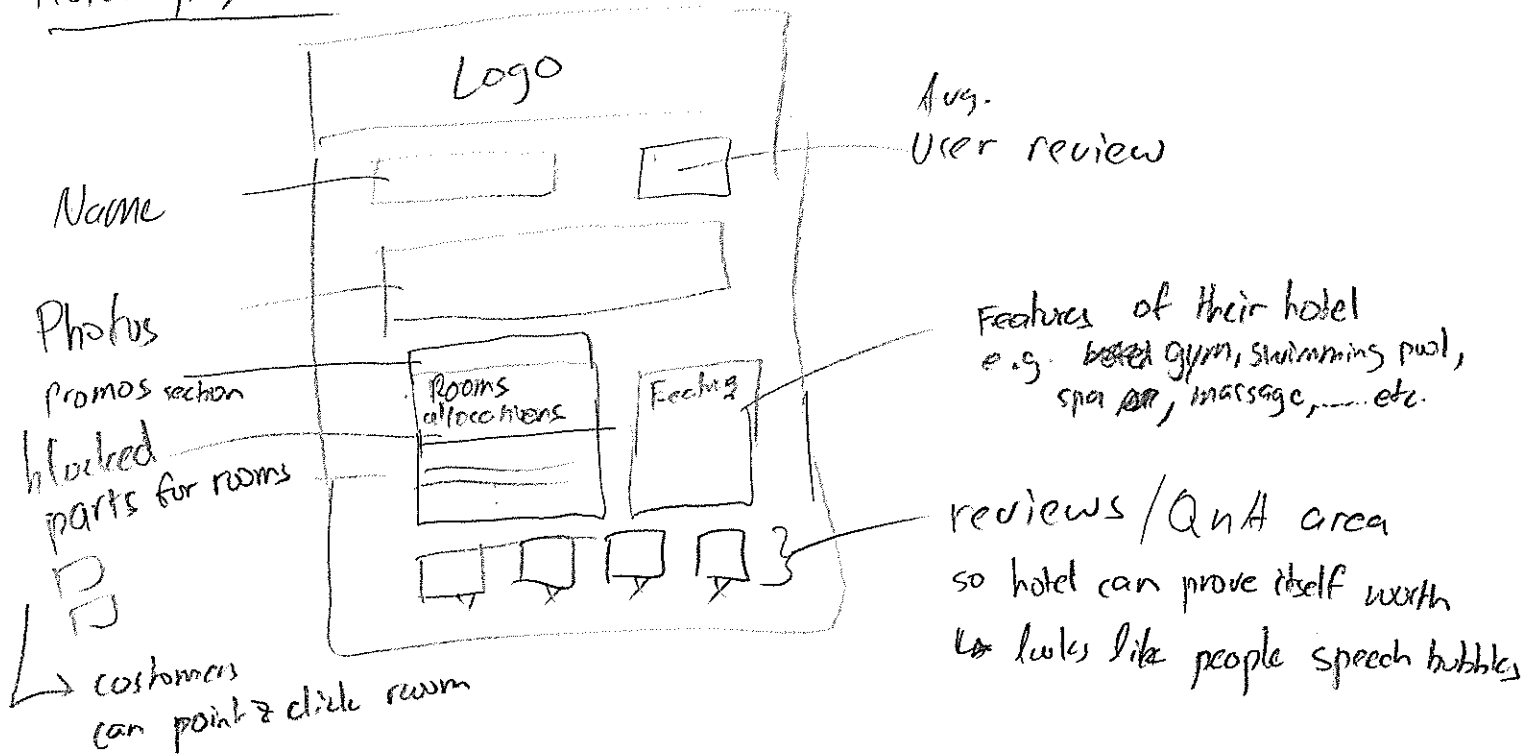

about information of person

e.g. name, age,

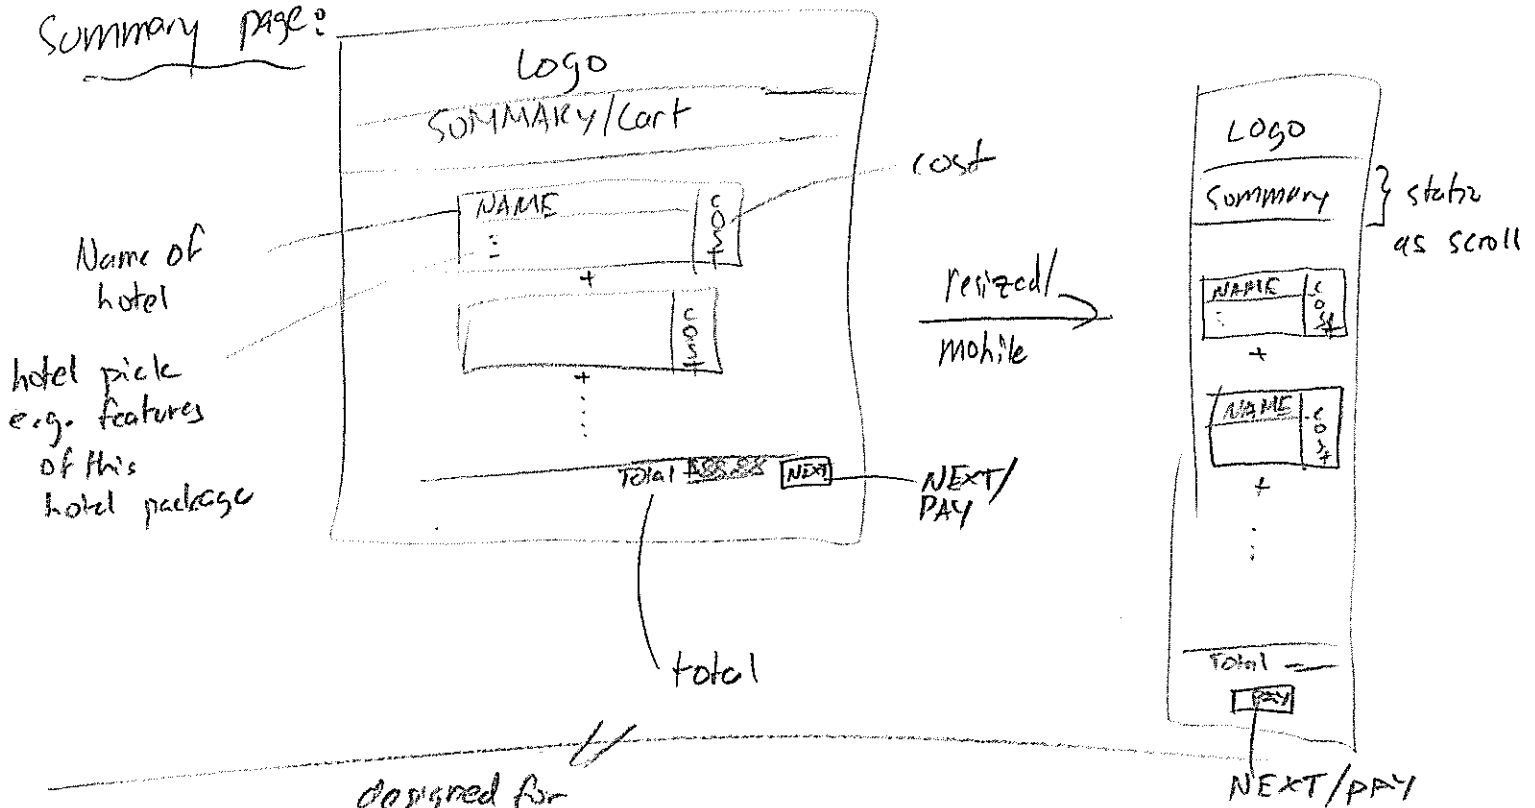

A sketch of a user profile page. It features a 'LOGO' at the top, a 'CURRENT' section with a table, and a 'PAST' section with a table. The 'CURRENT' section has a header row with columns for 'Date of hotel stay (checkin & check out) with time', 'Unsure of the placement of this?', 'information e.g. Hotel name, number of people', 'cost', and 'current transactions'. The 'PAST' section is labeled 'same format as current'. There are also two input fields on the left side of the page, one labeled 'Display Picture' and the other 'about information of person e.g. name, age,'.

same format as current

Hotel pages
